nharinirmd@gmail.com

Profile

I'm a freelance frontend developer, focused on designing responsive, attractive and friendly UI. My skillset includes HTML, CSS and Javascript (ES6). I currently work with ReactJS framework. I can also provide complete solution along with backend technologies such as NodeJS and PHP for creating server and include databases.

Experience

FREELANCER 2021

Currently working on website for Architectural based company using ReactJS.

HOBBY PROJECTS 2019 - 2020

Blurry tool using ReactJS, Shopping cart using NodeJS & MongoDB, Vanilla Javascript mini projects, Auctioner application using MySQL.

FRONTEND DEVELOPER @ DASC.IO; (REMOTELY) – 2018 MARCH - DECEMBER

I worked as a remote resource for a startup company "DASC.io" based in Australia. I worked briefly on creating and developing an web application for auction services.

THESIS STUDENT @ AXIS COMMUNICATIONS – 2017 MARCH - JUNE

I performed my Master thesis work at Axis Communications, Lund Sweden. My research was focused on improving the time taken for first paint of the website by loading the critical files initially. Design Science Research (DSR) methodology was utilised and developed a PhantomJS application, to identify and segregate used and unused CSS required for the first paint of the web page.
